Thank you, Qeios, for the invitation to review this manuscript.

This manuscript reports the "Synthesis and Antibacterial Screening of Cefradine Schiff Bases and Their Metal Salts."

In order to improve the quality of the manuscript, the major corrections mentioned below should be made.

1. Update introduction and increase references
2. The author did not conduct conductivity, TGA, SEM, TEM, and XTD, UV/vis spectra, and elemental analysis, which are required for the characterization of the metals complex.
3. Where are the IR and NMR charts? All compounds in one IR chart, all compounds in one NMR chart
4. The manuscript has many grammatical, typographical, and spelling mistakes.

Therefore, without full characterization of all the new compounds, I suggest no publication of this work on Qeios.

Thank you.
