

Review of: "Attention Mechanism Model Combined with Adversarial Learning for E-commerce User Behavior Classification and Personality Recommendation"

Ebrahim Khalili

Potential competing interests: No potential competing interests to declare.

The abstract section needs to be reformed so that the proposed model is pointed out more precisely.

The related studies section should include the research of the last two years (2023 and 2022).

The values obtained in the form of table should be added to the results section.

The flowchart of the proposed model should be accompanied by more details.
