

Review of: "[Perspective] Delta Radiomics — Potential Role in Head Neck Cancer"

Muhammad Yaqub

Potential competing interests: No potential competing interests to declare.

This work is not recommended for publication at this time;

- The discussion lacks depth in addressing the current challenges and limitations of delta radiomics in clinical practice.
- This review doesn't have any novel insights or future perspectives for advancing delta radiomics research. Including recommendations for further studies or clinical validation efforts would strengthen the overall impact.
- Incorporating comparative analyses with other imaging biomarkers or predictive models could provide a more balanced perspective on the strengths and limitations of delta radiomics in oncology.
