

Review of: "Assessing Reliability and Economic Viability of Different EV Charging Station Configurations"

Yong Hu

Potential competing interests: No potential competing interests to declare.

This manuscript provides a quick summary of the assessment of reliability and economic viability of EV charging stations. It's interesting. Here are the suggestions to the authors. (1) The importance of the assessment of reliability and economic viability needs to be more detailed in Section 1. (2) More technical details would be better in Sections 2-4. (3) The authors are suggested to provide the structure and main facility parameters of the EV charging station.
