

# Review of: "Women In Slum Risking Their Safety To Access And Usage Of Basic Water And Sanitation Facilities"

JN Devi

Potential competing interests: No potential competing interests to declare.

It was a thorough and interesting topic that is crucial in today's environment. I would like to suggest that the authors include recommendations like addressing norms, stigma, and discrimination and improving women's leadership, voice, and agency in governance. Also, add recommendations like narrowing the gender gap and other disparities through additional reviews. I appreciate the authors' effort in producing this material.
