Potential competing interests: No potential competing interests to declare.

After reviewing this manuscript, I found it needs some modifications in some sections:

- They need to provide more information for the hypotheses development section.
- They need to change in table 7 from H9 to H5.
- They need to rewire the discussion section because it is weak and doesn't give any new contributions. They need to tell the readers why the relationship between the variables is weak, moderate, or high and how they can improve it, and give some recommendations to these universities.
