

# Review of: "Knowledge, Practices and Attitude of Residents towards Buruli Ulcer in Jasikan Municipality: An Ethnographic Study"

Rajhab Mkakosya

Potential competing interests: No potential competing interests to declare.

The study is interesting and it has a good flow of information. However I would request the authors to add more details in the Introduction expounding more on the impact of the disease globally. The authors also need to add more voice in the result section than leaving letting it being filled with the excerpts.
