COMMENTS FOR THE AUTHOR:

The manuscript (RUIZ35): The paper title "Assessment of Quality, Bacterial Population and Diversity of Irrigation Water in Selected Areas of Minna, Niger State, Nigeria" is an interesting work to study.

Please find attached the MS with my corrections and comments. More or less, it looks like a report, and the language needs more improvement.

The abstract needs to be clearer and more precise.

The introduction is not up to date.

The methodology part is fine, but it is very elaborate. Reduce the part by citing proper references wherever relevant.

The authors should elaborate more on the results and discussion part.

The notations are not properly provided at several places, and some places details were not given.

An improved manuscript after thorough revision can be accepted.
