Cutaneous Melanoma pN2b TNM Finding v7

National Cancer Institute

Source

National Cancer Institute. *Cutaneous Melanoma pN2b TNM Finding v7*. NCI Thesaurus. Code C88392.

Cutaneous melanoma with macrometastases in 2-3 regional lymph nodes.

Macrometastases are defined as clinically detectable nodal metastases confirmed by therapeutic lymphadenectomy or when nodal metastasis exhibits gross extracapsular extension. (from AJCC 7th Ed.)
