

# Review of: "Ascorbic Acid Therapy in Hematological Malignancies - The Current Knowledge and Future Directions"

Toshiyuki Habu

**Potential competing interests:** The author(s) declared that no potential competing interests exist.

In this manuscript, Wing Kit Lam. et al. described Ascorbic Acid Therapy in Hematological Malignancies. The authors have explained that the ASA is a powerful tool for cancer treatment, especially for hematological malignancies. The author also has referred to the previous papers about ASA treatment and ASA physiological roles and cofactors for enzymes. The author concluded that ASA has the inherent potential to cancer.

Given that this manuscript is submitted for publication in Qeios journal, the scientific soundness would be reviewed.

## Minor Essential revisions

Some references are not original papers and had referred to original papers. Please check the original papers for references.
