

Review of: "Does Anger Management Among Prisoners Work? — A Review of Recent Meta-Analyses"

Polyxeni Georgila

Potential competing interests: No potential competing interests to declare.

Prisoners suffer from severe personality disorders, which lead to anger and aggression. This should be the focus of research. Please mention that in your paper.

What about abuse? Does abuse lead to a crime? Are there any studies?

Prisoners need long-term, recovery-oriented, evidence-based interventions, such as cognitive behavioral therapy and rehabilitation, among other factors such as job opportunities. These interventions should be evaluated regarding their effectiveness and efficacy. Please mention that.

Please write concrete research and clinical implications in your conclusion.
