Review of: "Chronic disease treatment default prediction with random sampling optimization."

Lakku Kanya Kumari

1. Keywords are not acceptable

2. Introduction part has to rewrite

3. Need to survey more and recent articles

4. Need to write more in methods section

5. Clear explanation of dataset is required

6. The novelty of the algorithm applied in the article is not up to the mark.

The article can be accepted if the modifications are done.
