

Peer Review

Review of: "Chelation Therapy for Rare Earth Element Toxicity: Current Evidence, Challenges, and Future Directions"

Murat Baykara¹

1. University of Health Sciences, Turkey

In general, it is a well-written article.

If possible, one or more images could be added that graphically explain the publication scanning and selection in the article sections 2.1 and 2.2.

The following references should be included in article section 3.1.1.

- DOI: 10.1016/J.NEULET.2019.134295
- DOI: 10.1002/JCP.30000
