GH, Rat Strain

National Cancer Institute

Source

National Cancer Institute. *GH, Rat Strain*. NCI Thesaurus. Code C14404.

GH: Develops hypertension, cardiac hypertrophy and vascular disease (Phelan 1968, Simpson and Phelan 1984, Simpson et al, 1994). Genetic hypertension in GH (but not SHR) may be associated with a defect in renal prostaglandin catabolism (Armstrong et al 1976).
