Potential competing interests: No potential competing interests to declare.

1.The author can briefly discuss the strengths and limitations of this study, as well as provide future directions, to inspire researchers in the field of FMT treatment for recurrent *Clostridioides difficile* infection.

2.The author can compare this study with previous research on other therapies for recurrent *Clostridioides difficile* infection or other studies on FMT treatment for recurrent *Clostridioides difficile* infection to highlight the unique aspects of this paper.

3.It is recommended to visualize the experimental process to provide readers with more information.
