I appreciate the effort of the authors in the research paper. For me, the research paper is good and its topic is important, especially in the recent period due to the increase in population and security weakness in some areas.

I have some notes about the organization of the research paper:

- 1) I suggest adding an abstract outline(Graphical Abstract) after the abstract paragraph.
- 2) I suggest adding a theoretical framework table extracted from a literature review.
- 3) The paper needs to organize the following paragraphs: (methodology, description of samples, discussion, results, and finally conclusions) ,because There is overlap in topics, tables, and figures.

with my regards
