Dear Author,

I have reviewed your paper and would like to provide my feedback.

Firstly, I would like to commend you on your effort in researching and writing the paper. The paper covers a relevant topic and provides a good overview of the subject matter.

However, there are a few areas in which the paper could be improved. The organization of the paper could be clearer and more structured, making it easier for the reader to follow the arguments and evidence presented. Additionally, some parts of the paper could benefit from further explanation and elaboration, which would strengthen the overall argument.

In abstract, a brief methodology needs to be mentioned. Implications must also be included. Overall, it needs to be rewritten in a crispy manner.

Update literature review to include 2023, 2022, 2021 internationals as well as domestic studies related to your topic.

Analysis is too basic and simple. No sophisticated tool has been used.

Conclusion section of this paper needs further refinement and followed by implication and future study of study which is totally missing.

In terms of the writing style, the paper is clear and concise, but some sentences could benefit from rephrasing to make them more concise and impactful. Also, there are some grammatical errors that should be corrected.

Despite these criticisms, the paper has potential and could be a valuable contribution to the field with some revisions. I hope that my feedback will be useful in helping you to improve your work and make it even more impactful.
