The authors proposed "Intelligent Transportation System Real-Time Tracking", however the research area is very interesting but required serious modifications and correction.

- * Title: the title required improvement. "Intelligent Transportation System *_for* Real-Time Tracking",
- * Abstract: This section required more analytical information. The proposed methods should be clearly stated and the results obtained.
- * Introduction: More references are required.
- * Section II should be merged with section 1 and reconstruct into the paragraph.
- * Section III, IV & part of V should be merged together and discussed wisely called Methodology.
- * No contribution to knowledge
- * No organization of the research
- * No related works section
- * Results and Discussion section is missing.
- * The list of references are outdated, and too small. More recent related works reviewed are required between 2018-2023 to show trends and research gaps in this field.
- * The whole article should be arranged as
1. Introductions 2. Related works 3. Methodology 4. Results and Discussion 5. Conclusion.
