

Review of: "The Application of PROMETHEE with the recalculated weight method as a more accurate measurement for the selection of the best Hybrid Renewable Energy Technology for a slum building"

Mohsen Rezaei

Potential competing interests: The author(s) declared that no potential competing interests exist.

This topic is interesting and seems to be practical. However, there are some concerns to be resolved carefully at this stage. Please find my comments in the following:

1. Survey table is preferred to summarize the pros and cons of other investigations can highlight more the paper contribution and novelty.
2. What is the main novelty of this research?
3. Table numbers are wrong. Please resolve these errors.
4. Please more explain HOMER software.
5. Provide an overall flowchart of the proposed methodology.
6. What are the criteria given in Table 2?
7. Calculate one of the values in Table 12 and 13 as an example.
8. Discuss the managerial implications of the results in more detail.
9. Future works of the research should be presented in the manuscript.
