

Review of: "The Choice of Breeding Objectives and Selection Criteria Decided by Breeders of Various Goat Breeds and Factors Influencing Them"

Denis Cvitković

Potential competing interests: No potential competing interests to declare.

The article provides a thorough insight into the breeding objectives and selection criteria of goat breeders in the United Arab Emirates. The paper is well-structured and acceptable for publication with minor corrections.

Suggestions:

1. The title should be changed to "The Choice of Breeding Objectives and Selection Criteria Decided by Breeders of Various Goat Breeds in the United Arab Emirates"
2. There are minor linguistic errors in the text that should be checked and corrected.
3. Table 6 should be placed before the chapter "Conclusion".
4. In the Conclusion chapter, a few sentences should be added that would present the main research results to readers from other parts of the world with regard to the climatic and pedological (geographical) specificities of the breeding area (UAE).
