Potential competing interests: No potential competing interests to declare.

1. In the abstract, an explanation of the background and urgency of the research can be added (the urgency of research regarding the importance of understanding the relevance of judgments was formed by their education in school)
2. Introduction and Theoretical Background are complete
3. The validity of the research instruments used should be explained by quantitative (R statistical) or qualitative method (expert review)
4. In the research results section, a qualitative and/or quantitative explanation of the results of the answers to the questions worked on by the research subjects should be added
5. In the discussion section, add an explanation of (1) findings from the research, (2) suitability and gaps with other research results,
