Review of: "PSO and the Traveling Salesman Problem: An Intelligent Optimization Approach"

Sukanta Nama[1]

1. Independent researcher

Comment for the Authors: The work is well written, but the results and discussion are very poor. So I suggest the authors discuss this section elaborately. Also, the advantages and disadvantages of PSO, how it overcomes the algorithm. Define the flowchart of the algorithm. Write the Matlab code in the appendix. Also, write the link to the data used in this study. Explain the algorithm parameter setting. Compare the results with at least five other algorithms.
