

Review of: "Neuro-Fuzzy-Based Adaptive Control for Autonomous Drone Flight"

Zhiyao Ma

Potential competing interests: No potential competing interests to declare.

1. The presentation of this article needs to be improved for better reading, for example, How to define $p_a = \frac{1}{2} \rho V^2$ below (10) ,etc.
2. Some remarks should be added to further highlight the differences and technique difficulties comparing with the existing results.
3. Why the problem considered in this paper is important? More clear motivation and contribution of this paper should be provided.
