Review of: "Machine Learning Methods in Algorithmic Trading: An Experimental Evaluation of Supervised Learning Techniques for Stock Price"

Manikandan Ramachandran[1]

1 SASTRA Deemed University

1. The motivations should be strengthened when revising in the introduction. The authors should further enlarge Introduction with current results to improve the research background.

2.Structure of the paper is not well defined. Paper represents very basic work with very less scientific proofs.

3.Mathematical analysis of the proposed scheme is very weak.

4.The language usage throughout this paper need to be improved, the author should do some proofreading on it.

5.What is the motivation of the proposed work? Research gaps, objectives of the proposed work should be clearly justified.
