

# Review of: "Fluoxetine plus lithium for treatment of mental health impairment in Long Covid"

Yulia Sorokina

**Potential competing interests:** The author(s) declared that no potential competing interests exist.

The article is rather relevant and suggested treatment is promising. Author shows the necessity and probable efficacy of drug combination for Long covid. The doses are to be lower and that's why adverse reactions are likely to be mild or absent. To reveal the value of treatment it would be great to claim the inclusive criteria wider, describe how the efficacy of combination will be controlled, what symptoms exactly require the mentioned combination.
