

Review of: "Saltwater Intrusion in Coastal Aquifers: A Comprehensive Review and Case Studies from Egypt"

Mariana Barbosa Timo

Potential competing interests: No potential competing interests to declare.

The article provides an excellent literature review of saltwater intrusion in coastal aquifers.

An important case study on the intrusion of saltwater in Egypt was also presented. The information was presented in a clear and well-organized manner. Analytical data and analyses were important for a proper understanding of the problem and for planning treatments for controlling and monitoring the situation.

In the end, the authors presented a critical analysis of the situation, considering the possibility of future studies.
