Potential competing interests: No potential competing interests to declare.

I appreciate the exploration and discussion of the application of AI in the service sector. However, I believe that there is an opportunity to further enhance the state of the art by considering other studies beyond your own references. While your work is undoubtedly valuable, incorporating insights from a broader range of sources could provide a more comprehensive understanding of the subject matter.

Additionally, it would be beneficial to expand on potential applications of the technologies discussed in your paper to other fields. By highlighting these practical implications, your research could have a broader impact and relevance.

Overall, extending the literature review beyond your own contributions and discussing cross-disciplinary applications would strengthen the significance and applicability of your work.
