

Review of: "Different pattern of menstrual in patients with COVID-19 infections"

Rizaldy Pinzon

Potential competing interests: The author(s) declared that no potential competing interests exist.

This is a good study. The number of study subjects was sufficient. The authors should be more concise in introduction. Please add the ethical approval in the method section. Please add the information the time course when the authors obtained the data, either after diagnosis or after cure from covid. The discussion section should begin with the main finding of your study.
