

# Review of: "The Change of Basis Groupoid"

Edoardo Salati<sup>1</sup>

<sup>1</sup> Technische Universität Dresden

**Potential competing interests:** No potential competing interests to declare.

The paper presents little enhancement to the mathematical modern knowledge; concrete applications of this new frame would add value to it.

The author has made some improvement with respect to the previous versions, but the article still needs a great amount of work to meet modern standards for math publications.

More details in the supplementary data.
