

# Review of: "Comparative Analysis of Sustainable Livestock Development as a Source of Livelihood to Farmers of Maharashtra and Jammu and Kashmir"

Shanker Raj Barsila<sup>1</sup>

<sup>1</sup> Agriculture and Forestry University

Potential competing interests: No potential competing interests to declare.

1. Authors have failed to show the reasons for comparisons of two unlikely ago-ecological sites (Himalayan belt and the hot terrain).
2. The first paragraph of the Introduction section is not necessary to place in the manuscript. The authors would opt to write based on Indian conditions only.
3. Authors did not disclose why only two years of livestock population are compared on a national reference scale of India.
4. The livestock breeds adapted in both of the states have not been disclosed in the manuscript.
5. Referring to Table 2, the discussion perhaps does not explain why there is a slow adoption rate of exotic breeds of livestock.
6. Table 3 is missing??
7. Chapters for future strategies could be separated from conclusions, and the conclusion could be placed after the demanded strategy.
