**Potential competing interests:** No potential competing interests to declare.

This article analyzes the changes caused by COVID-19, highlighting the importance of the role played by professionals in the care of the elderly, focused on avoiding more serious sequelae, either due to previous pathologies or COVID-19, highlighting the role in residences, and paying special attention to patients with dementia. The article is quite interesting and I encourage the authors to continue researching on the subject.

Some impact articles can help authors to enrich their article.
