Potential competing interests: No potential competing interests to declare.

This paper focuses on how to make students and parents aware of the harmful effects of drug use, their impact on physical and mental health, and on academic performance.

The recommendations are relevant enough to enable students and their parents to effectively combat drug use, particularly khat, by creating anti-drug clubs.

Communication between parents and students is also a key factor in drug prevention.

Remarks:

Key words are missing from the abstract.

The methodology is sound, with reliable tools

The results are convincing

The discussion was based on a wide range of comparative studies.

The bibliography is fairly extensive and complies with standards.

The article can be published once the keywords have been integrated.
