The topic is interesting and important. However, there are several key areas that need more work.1- We recommend that the authors rewrite the abstract. The abstract should contain Purpose/Objectives, Methods/Analysis, Findings, and Novelty/Improvement. It is suggested to present the abstract in one 150-250 words paragraph.2 - The authors should better explain the criteria for the choice of the research object, as well as indicate the application of the findings.3 - It is suggested to compare the results of the present study with previous studies and analyze their results completely.4 - Authors should explain the academic contribution of the work developed (50-150 words in conclusion), highlighting what is innovative/original about the existing literature.5 - In the "Conclusion" section, you should describe the recommendations of the study as well as the research perspective.
