

Review of: "The use of tele-education in medicine, during and beyond the COVID-19 pandemic: A commentary"

Cesar Collazos¹

¹ University of Cauca

Potential competing interests: No potential competing interests to declare.

The idea is interesting, there is a good description of some activities that could be done supporting specific medicine activities using technology. However, in the discussion, the analysis is too general, it could be adequate to make a specific analysis of advantages and disadvantages of virtual education on medicine activities. Also, check some works, where some aspects about use of teleeducation during COVID-19 had been done:

Collazos et al, **Designing Online Platforms Supporting Emotions and Awareness**

Giovanella et al, **The effects of the COVID-19 pandemic on Italian learning ecosystems: The school teachers' perspective at the steady state**
