

Review of: "Investigating the Levels of Obsession, Fear, and Self-Care Behaviors Related to COVID-19 in Fully Vaccinated and Partially Vaccinated Diabetic Patients"

Potential competing interests: No potential competing interests to declare.

Paper written is on Covid 19 and vaccination hesitancy which is an important topic we all faced with during pandemic. Authors well documented the issue with tables provided and almost satisfying references.

Few suggestions related to mostly the references written style & format. Other than them, some are also enlisted according to the sections & lines as follows:

Methodology: 1st sentence here is actually doubling, unnecessary to repeat !

Key words should be updated for being cited by the future papers in the coming months or years, such as;

-Obsession, Covid 19, Fear, Selfcare behaviour, Diabetes, Full vaccination, Partial vaccination

Introduction: Line3: the given number of death toll from Covid 19 is 3 years behind of our current time. I do suggest it to be updated from WHO website with access date and web address given.

Last Sentence: ...help improvedelete "to" in between !

Section 2.2: What does GHQ refer to?

Why over age of 65 (elderly) not studied (included in the paper), would be an interesting data and comparison ?

Table1: What do you mean by cycle of diploma? May be explained under the table.

Conclusion: Delete in the first sentence 'presence of'....carry on with....The clinical psychologists and.....

Instead of 'can be used'...replace with...'can be put in charge'....

Delete "including"....replace with....'for' vaccination.....
