Potential competing interests: No potential competing interests to declare.

Dear Author,

I have reviewed your manuscript and identified several areas that require attention:

1. Parameter/variable selection: Please ensure your choices are more rational and well-justified.
2. Scoring system: The current scoring method lacks clarity. Please provide more details on how it was developed and applied.
3. Maps: The maps need significant improvement in terms of clarity and presentation.
4. Validation: A quantitative approach to validation would strengthen your findings.
5. References: The reference list is incomplete. Please ensure all citations in the text are included and follow the required formatting guidelines.

Addressing these issues will greatly enhance the quality of your manuscript.
