Review of: [Empowering Minds: The Evolution of Higher Education in Tamil Nadu towards Innovation and Excellence](#)

Abstract: The Abstract present the context of the paper very lengthy. In essence the abstract gives a full explanation about the current situation which most part of it could have been included in the introduction. The Abstract is expected to include a short context, aim or purpose of the paper, the methodology and instruments to be used including the conclusion. However, they are all missing in this paper.

The paper does not indicate how data was collected, whether it was a desktop study or not. Instead, it is more about literature and the explanation of the current state of education. Citation of certain information obtained from other authors is missing.

I recommend that the researcher go through steps by steps of article writing to improve this paper.
