Potential competing interests: No potential competing interests to declare.

1. Several data is provided in the introduction. It needs to be supported by references.
2. In the introduction, acceleration is given as 2.4 s to 15.9 s. However, the unit of acceleration is m/s². The acceleration of 2.4 s to 15.9 s should be explained.
3. After ref 1, ref 9 is cited and those inbetween were skipped.
4. The motive for this study is not mentioned. what is novel in this paper?
5. The authors studied Atherx which is a 2 wheeler but the picture in figure 6 shows a car.
6. Figures from results need to be interpreted and explained.
7. Some figures are not legible.

The paper needs to be revised.
