

# Review of: "New Method to Identify Potential Illegal Water Use Location by Using Remote Sensing and Neural Networks in Laguna de Aculeo, Chile"

Vinamra Sharma<sup>1</sup>

<sup>1</sup> Rajiv Gandhi Institute of Petroleum Technology

Potential competing interests: No potential competing interests to declare.

- (1) Show the neural network method through a flow diagram.
- (2) Also add some data tables for validation of the proposed method.
- (3) The authors did wonderful work and presented an innovative approach in the built environment, highlighting an overlap between remote sensing work and computer engineering interfaces.
