# Bulldog

National Cancer Institute

## Source

National Cancer Institute. *Bulldog*. NCI Thesaurus. Code C53847.

The Bulldog is small in stature, but wide and compact, with a thick, massive head. The skin on the skull and forehead should fall in dense folds. The ears should be small and thin, folded back in the form of a rose. The coat comes in red, fawn, brindle, pale yellow or washed-out red, or white. Height: about 12-16 inches (31-40 cm.) Weight: 49-55 pounds (22-25 kg.)
