

Review of: "WaveBit — Nonbinary Computation: I Symmetric Cryptography"

Soumyajit Goswami

Potential competing interests: No potential competing interests to declare.

Good for publication after working on the below points -

- 1> Grammatical mistakes should be corrected in all sentences.
- 2> Not very organized.
- 3> Use the full form of abbreviations where those are used for the first time.
- 4> There is no discussion of the computational complexity.
