Dear Editor,

Thanks for the chance to review this article. This article is informative and well-written and can be accepted. However, the following points have to be rectified before acceptance:

1. References have to be updated. I could find till 2015.
2. Fishery by-products, by-catch, these terminologies have to be explained properly. Otherwise, no meaning. What are the by-products, where they are collected, how they are processed, etc.
3. What is the protein content of the feed?
4. All the tables have to be checked.
