

Review of: "[Mini-review] Impact on Oral Health of Smoking Cigarettes, Cigars or Hookahs"

Hana Pervez

Potential competing interests: No potential competing interests to declare.

The mini-review is well written. In my viewpoint, more emphasis should be given to prevention strategies as the literature is full of studies on the oral health-related effects of smoking.

More information on the role of dentists in mitigating the effects of smoking should be emphasized. The kind of knowledge and training required in tobacco cessation strategies should also be highlighted.
