Potential competing interests: No potential competing interests to declare.

-topic of the research is interesting and potential.

-Introduction needs to be improved.

-literature review is not sufficient, author need to add more supportive arguments in favor of his selected variables.

-single criteria for Lag selection might be misleading, atleast two should be chosen.

-results needs to be reviewed and explain well.

-conclusion is insufficient.

-what will be the contribution of research.

-apart from the suggestions, topic is good and worth study. article can be improved keeping in view above suggestions.
