Dear author, This publication is well-written; however, I would like to make a few suggestions:

- a) please update this publication by adding the latest article.
- b) Figure 2 is not very clear; please use the high-resolution image.
- c) For the analysis, please explain why the result was obtained and why using Sentinel 2A images performs better than Landsat 8.
- d) Explain how the data was obtained and the features selected to produce such an image.
- e) There are no recommendations for future work.
