Dear Author

I wish that everything is well and safe and at peace with all of you.

I appreciate the opportunity to contribute to your manuscript "Qeios ID: 3GABRB".

Please accept these corrections and suggestions with my respect and thanks and the intention of further improving the quality of the manuscript.

- The manuscript is very well structured and organized.
- The sections are very well referenced.
- The Ethics Committee registration was provided.
- The experimental botanical material was properly identified and deposited in a herbarium.
- Page 2_Abstract_Line 2: Considering the scientific publications of *Rhamnus prinoides* [Approximately 2,250 results] and *Clematis hirsuta* [Approximately 10,800 results], it is better to review this statement.
- Page 12-15_References: are relatively up to date.
