Potential competing interests: No potential competing interests to declare.

This paper presents an interesting research topic and introduces some novel viewpoints and conclusions. However, more details and explanations need to be provided in the full paper to enable readers to fully understand and evaluate the quality and reliability of the research.

1.Methodology and data: there is limited information on the dataset used and the selection of samples. In the full paper, more detailed information on the methodology and data should be provided to enable other researchers to replicate and validate the research findings.

2.Interpretation of results: a more in-depth analysis and interpretation of this result should be provided to help readers better understand the author's viewpoints and conclusions.

3.Scope and applicability of the study: a more detailed discussion on the scope and applicability of the study should be provided to enable readers to assess the reliability and generalizability of the research findings.

4.Policy recommendations: In the full paper, a more detailed explanation and justification of this policy recommendation should be provided to enable readers to assess its feasibility and effectiveness.
