Ovarian Retiform Sertoli-Leydig Cell Tumor

National Cancer Institute

Source

National Cancer Institute. *Ovarian Retiform Sertoli-Leydig Cell Tumor*. NCI Thesaurus. Code C39971.

A Sertoli-Leydig cell tumor of the ovary in which anastomosing, slit-like spaces resembling rete testis constitute at least 90% of the tumor elements. It may present with estrogenic and less often androgenic manifestations. It usually follows a benign clinical course.
