# Paternal uniparental disomy of chromosome 1

INSERM

## Source

*INSERM. (1999). Orphanet: an online rare disease and orphan drug data base. Paternal uniparental disomy of chromosome 1. ORPHA:251004*

Paternal uniparental disomy of chromosome 1 is an uniparental disomy of paternal origin that most likely does not have any phenotypic expression except from cases of homozygosity for a recessive disease mutation for which only father is a carrier.
