Potential competing interests: No potential competing interests to declare.

Nice paper on a very interesting subject, with a clear focus on the social, economic, and cultural issues of architectural heritage. I suggest, to improve it, to add: 1) in subchapter 3.3, some technical information on construction materials (typology, conservation/degradation status, recuperation/replacement measures); 2) in the 4. Discussion, some confrontation with similar studies/situations at the national and international levels.
